

## RACK SERIES

Olympic Rack G510

**BH**

P.V.P.

EAN:

Strength

The Olympic Rack is a multi-position bench designed to offer versatility in strength training in a semi-professional environment. This bench allows for multiple adjustments to perform horizontal, incline or decline bench exercises. The bars are adjustable and include two J-hooks for positioning an Olympic bar, plus two safety brackets that convert the G510 into a squat rack. Two accessories can be added to make the G510 a multi-functional bench for working other muscle groups (biceps curl + leg extension or butterfly).
